

SAWO ELECTRIC SAUNA HEATER

www.sawo.com | info@sawo.com

HELIUS HIDDEN HEATER

The best thing about the Helius heater is that, it can be hidden inside the sauna room! Genius, isn't it?

This exquisite looking modern heater has a slim shape that defies space. It can safely fit with zero tolerance on walls and benches.

Helius heater is placed on a recess area of the sauna room that hides it. Containment of the heater prevents accidental burns and misuse.

HELIUS HEATERS FEATURES

The Helius heater comes with an extra accessory for water.

The heater has a hose that connects water basin which you can place anywhere inside the sauna room.

The water that runs through the hose passes to the heater water pipe and evenly pours water unto the stones. A radiant steam is created by gradual droplets of water.

Helius heaters are floor standing heaters that are made of robust stainless steel.

The heater air vent design is very effective which makes heat temperature to increase rapidly inside the room.

One may also add optional wooden embed to add accent to the heater.

Available in 4,5kW, 6,0kW and 7,0kW.

- Fit anywhere inside the sauna room / hidden behind benches.
- Safely touch wall or benches.
- With water distribution accessory.
- Rapid sauna room temperature.
